**✿ Plaque d'auto-mélange pour céramique**

**Ez-Master® B-007**

320mm(L) × 184mm(D) × 35mm(H)

■ Features ■ Caratéristiques ■ Caratteristiche

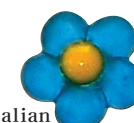

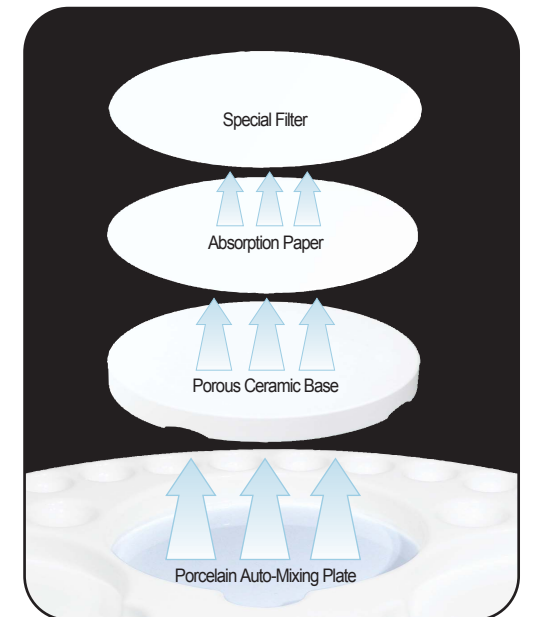

English

- Ez-Master® will save your time & materials.
- Ez-Master® will make your dental porcelain work more efficient and smoother.
- Ez-Master® reduces the mixing time for porcelain work because the system rapidly absorbs distilled water or modeling liquid.
- Ez-Master® allows moisture retention when using our system of Porous Ceramic Base.
- Ez-Master® induces automatic mixing as soon as the porcelain powder is applied on the Special Filter.
- Ez-Master® regulates the absorption of modeling liquid through the thin micro porous Special Filter from the Absorption Paper and Porous Ceramic Base. This environment provides continuous moisturizing of the porcelain powder creating a suitable condition for build-up work.
- Ez-Master® will be very effective for all dental ceramists, from beginners to masters.

French

- Avec Ez-Master®, gain de temps et de matériaux
- Ez-Master®, pour un mélange plus facile de la poudre céramique afin d'obtenir un meilleur résultat
- Système de base poreuse, Papier Absorbant et Filtre Special réduisent le temps de travail et du mélange de la poudre céramique. Le système absorbe rapidement l'eau distillée ou le liquide à modeler et conserve l'humidité. Ez-Master® favorise l'auto-mélange dès que la poudre céramique entre en contact avec le filtre special.
- Le filtre special aux pores microscopiques permet de contrôler la quantité appropriée de liquide à modeler nécessaire venant de la base poreuse et du papier absorbant. La poudre céramique peut être mélangée dans les conditions idéales au modelage. La poudre céramique n'a pas besoin d'être humidifiée continuellement.
- Ez-Master® est vraiment un outil efficace pour les ceramistes du prothésiste débutant au plus confirmé.

Italian

- L'Ez-Master® farà risparmiare il vostro tempo e i materiali.
- Con l'Ez-Master® modellerete la porcellana migliorando e semplificando la qualità del vostro lavoro.
- Le piastre porose per Assorbimento e il Filtro Speciale ridurranno il tempo di miscelazione per lavorare la porcellana perché il sistema assorbe rapidamente l'acqua distillata o i liquidi modellatori e mantiene l'umidità. L'Ez-Master® farà la miscelazione automatica appena è possibile applicare la polvere di porcellana sul Filtro Speciale.
- Il Filtro Speciale che è un filtro poroso sottile controlla la giusta quantità del liquido per modellazione dalla Ceramica Base Porosa e la Carta per Assorbimento così che la polvere di porcellana può essere miscelata nelle condizioni più adatte per la del modellato. L'Ez-Master® sarà efficace per tutti i ceramisti dentali, dai principianti ai maestri.

**Porcelain Auto-Mixing Plate**  
**Plaque d'auto-mélange pour céramique**

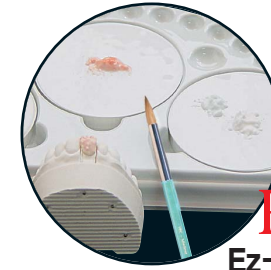

**Ez-Single® B-008**

- Features • Caractéristiques • Caratteristiche
-  • Excellent moisture absorption
  -  • Contains numerous micro pores in order to supply the water
  -  • Excellent humidification par absorption
  -  • Eccellente assorbimento dell' umidità

- Features • Caractéristiques • Caratteristiche
-  • Special Filter does not allow contamination of debris from the mixing plate due to the glossy and smooth surface.
  -  • Special Filter is not easily torn, and they are reusable by washing them under running water
  -  • Le filtre spécial de par sa texture brillante et souple évite l'inclusion de toute impureté dans la poudre céramique.
  -  • Le filtre spécial est résistant et peut être réutilisé à condition de le nettoyer à l'eau.
  -  • Il Filtro Speciale non assorbe detriti di porcellana dopo la miscelazione in quanto la superficie liscia e porosa non consente alcun assorbimento.
  -  • Il Filtro Speciale è resistente sia alla spatola che ad altri attrezzi non si strappa facilmente e può essere lavato con acqua corrente o acqua bollita.
